

Want solar panels? And maybe battery storage too?

Adding solar with or without battery storage to your home or business is a great way to take action against climate change and reduce your energy bill. If you go with solar plus storage, you can also ensure that you have power next time we have a power outage, without needing to run a noisy, fossil fuel generator.

The following is a list of some of the companies offering solar+storage in Marin:

PacSolar

415.299.8989
