BIOMIMICRY:

Nature-Inspired Solutions to Environmental Protection
Tuesday, January 15

We are pleased to announce our Spring 2019 *Innovation in Climate Protection* 4-part series

We have assembled a group of exciting speakers and conversationalists for you to discover, who are inventing current and creative technologies to lower greenhouse gas emissions

Register today

President's Message

Happy New Year! This past year rushed by so fast, and it is hard to believe that we are here again at the start of another new year.

For Environmental Forum of Marin, 2018 marked an incredibly busy year -- Master Class 44 graduated and MC 45 began, we hosted a series of thought-provoking community education events culminating in our most well attended event ever with Congressman Jared Huffman, Arlie Hochschild and Mark Hertsgaard, AND we established the Founders Fund -- just to name a few things!

The fun continues into 2019! Please don't miss our four-part series on *Innovation in Climate Protection* beginning on the evening of January 15 with an inspiring program focused on Biomimicry and its application to environmental protection. The speakers are leaders in innovative and disruptive thinking.

Along with Sustainable Fairfax, we are hosting a film screening of *Wasted; the Story of Food Waste* on January 25 (learn more as as you read through this newsletter).

Advocacy Training Highlights: Master Class 45 Advocacy Speeches

Kraemer Winslow, Master Class graduate and Principal of Make Your Point Communications, masterfully guided students in preparing and delivering advocacy speeches required for completion of the Master Class. Tom McAfee, graciously donated his time to videotape the students' speeches. Phyllis Faber, a founding Master Class teacher, was first in the audience (which also included former graduates Kathy Cuneo, Robert Miller and Kate Powers) to congratulate students for their exceptional, thoughtful work, directly addressing climate change. Renee Goddard, Vice Mayor of Fairfax, provided invaluable tips on making effective advocacy presentations to a Town Council.

Master Class student, Daisy Carlson advocated for tax-deductible carbon offsets as an effective way to lower GHGs. Marcus Thorndike invited us to join the new country, "Earth" and to register as declared citizens. Patrick Costello presented a case for cessation of our "addiction to dinosaur.

Best wishes to you all for a great year ahead!

Susan Rusche, President

Family Resource, Youth Development Center
and Warm Wishes MarinLink sponsored 2018

Family Resource, Youth Development Center and Warm Wishes MarinLink sponsored 2018 Helping Hands Holiday Wishes Project on Saturday December 22. A hot delicious meal was prepared by Cornerstone Community Church for the community at large. Staff and youth from the Family Resource and Youth Development Center packaged 150 donated backpacks with warm blankets, socks, gloves and scarves for families in the community. Terrie Green, Project Coordinator, Norma Fragoso and Barbara Bogard (all EFM MC graduates) chipped in with supplies and assisted youth organizing backpacks to be delivered for the holidays.

What We're Watching Now:

Thanks to videographer Tom McAfee (MC 44), you can VIEW THE VIDEO of our November 19 program, The Great Divide:

Can We Work Together for a Healthy
Environment, with guest speakers,
Congressman Jared Huffman, Arlie
Hochschild, and Mark Hertsgaard. This and other past programs available on our Environmental Library (under "Ways to Engage").

Also of interest, Kristina Hill and former EFM guest speaker, is featured in several episodes of <u>Sinking Cities: A Four-part</u>

<u>Series on the Threat of Climate Change</u> on PBS. The series examines how cities around the world are preparing for the real-time
